

Aniocyn, now available in stores in the Nordic region

Aniocyn, Bactiguard's wound care product for pets, is now available at Arken Zoo, Vetzoo and in Musti Group's other stores in Sweden, Norway and Finland. The product cleans and supports the natural wound healing by eliminating both bacteria, viruses and fungi, without irritating or stinging.

Musti Group reaches customers via the retail chains Musti and Mirri, Musti, Arken Zoo and Djurmagazinet as well as through the pure e-commerce channels Peten Koiratavirke and Vetzoo. Aniocyn is sold in more than 300 physical e-commerce stores in the region.

“We have an exciting autumn ahead of us together with Musti Group, the leading chain for pet products in the Nordic region. Being able to offer quality products for infection prevention and wound care for our pets, is something we are very much looking forward to”, says Andreas Wallgren, General Manager Nordic at Bactiguard.

About Aniocyn

Aniocyn is a water-based solution for pets, intended to clean and support the natural healing of various types of wounds such as bites, lacerations, cuts and burns. Aniocyn reduces the risk of infection by eliminating bacteria, viruses and fungi without irritating the skin or stinging. The product contains no alcohol or preservatives and is safe in case of wound licking. Aniocyn can be used around sensitive areas such as eyes, mouth, nose and ears. It also reduces fetid wound odour.

About Bactiguard

Bactiguard is a Swedish medical device company with a mission to save lives. To achieve this mission, we develop and supply infection prevention solutions which reduce the risk of infections and the use of antibiotics. This way, we save significant costs for healthcare and the society at large.

The Bactiguard technology is based on a thin noble metal alloy coating that prevents bacterial adhesion and biofilm formation on medical devices. Bactiguard offers the technology through licence agreements and our BIP (Bactiguard Infection Protection) portfolio of products. Urinary catheters with Bactiguard's coating are market leaders in the USA and Japan through our licensing partner BD. Bactiguard's product portfolio also includes a non-alcoholic product line for wound care and disinfection. It effectively kills viruses, bacteria and fungi while being biocompatible, pH neutral and tissue friendly. The active ingredient hypochlorous acid is the same substance as the body's immune cells use in their defence against infectious organisms.

Bactiguard is in a strong expansion phase in the markets in Europe, China, India and the Middle East through our own product portfolio and by establishing licensing deals in new therapy areas. Bactiguard has about 180 employees around the world. Its headquarters and one of three production facilities are located in Stockholm, the other two in Malaysia. Bactiguard is listed on Nasdaq Stockholm.
