**About Bactiguard**

Bactiguard is a Swedish medical device company with a mission to save lives. To achieve this mission, we develop and supply infection prevention solutions which reduce the risk of healthcare associated infections and the use of antibiotics. This way, we save significant costs for healthcare and the society at large.

The Bactiguard technology prevents bacterial adhesion and biofilm formation on medical devices. Bactiguard offers the technology through license agreements and our BIP (Bactiguard Infection Protection) portfolio of products. Through our license partner BD, urinary catheters with Bactiguard's coating are market leading in the USA and Japan. Bactiguard's own product portfolio of urinary catheters, endotracheal tubes and central venous catheters prevent some of the most common infections which appear in the urinary tract, the blood stream and the respiratory tract.

Bactiguard is in a strong expansion phase in the European markets, China, India and the Middle East by establishing license agreements in new therapeutic areas. Recently, Bactiguard completed the acquisition of Malaysian Vigilenz, a manufacturer and supplier of medical devices and consumables, primarily within wound care and infection prevention.

Following the acquisition, Bactiguard has about 180 employees around the world. Its headquarters and one of three production facilities are located in Stockholm, the other two in Malaysia.

Bactiguard is listed on Nasdaq Stockholm.
