

Growing interest in infection prevention in the Middle East

Bactiguard has received an order from the Middle East, comprising 2 000 central venous catheters (BIP CVC) and 20 000 Foleys (BIP Foley). The delivery will take place before the end of the year.

The Middle East is one of Bactiguard's focus markets and continues to generate repeat orders, so far primarily of Foley catheters. There is a growing interest from the healthcare sector in the region to use Bactiguard's products in preventing healthcare associated infections.

"We are very pleased that we have received a large order for central venous catheters, preventing catheter-related bloodstream infections, a severe condition. Preventive measures are becoming more important as antibiotic resistance is increasing and Bactiguard's products can make a major difference to exposed patients", says Cecilia Edström, Director of Sales & New Business.

About Bactiguard

Bactiguard is a Swedish medtech company with a mission of preventing healthcare associated infections, reducing the use of antibiotics and saving lives by developing and supplying infection prevention solutions for the healthcare industry. The company's patented coating prevents healthcare associated infections by reducing bacterial adhesion and growth on medical devices. Bactiguard®-coated urinary catheters are market leading in the US and Japan, and in recent years the company has developed its own product portfolio of catheters for the urinary and respiratory tract and the blood stream. Bactiguard is currently in a strong expansion phase, focused on new markets in the Europe, Middle East, Asia, Latin America and Southern Africa. The company has market presence in some 50 countries and has about 60 employees. Its headquarters are located in Stockholm and production facilities in Sweden and Malaysia. Bactiguard is listed on Nasdaq Stockholm. Read more about Bactiguard at www.bactiguard.com.
