About Bactiguard

Bactiguard is a global medtech company that develops antibacterial, biocompatible and safe technology and solutions to prevent medical device related infections across five therapeutic areas – orthopedics, urology, intravascular/critical care, dental, and wound care.

Bactiguard's unique technology is based on a thin noble metal coating that prevents bacterial adhesion and biofilm formation on medical devices. Bactiguard's infection prevention solutions make a positive impact by decreasing patient suffering, saving lives and unburden healthcare resources. They also fight against antimicrobial resistance, one of the most serious threats to global health and modern medicine.

Bactiguard operates through license partnerships with leading global medtech companies, such as BD and Zimmer Biomet, enabling them to bring medical devices with the company's unique infection prevention technology to the market. Bactiguard also has a portfolio of wound management products and sutures.

Bactiguard is headquartered in Stockholm and listed on Nasdaq Stockholm.
